**AutoCAD Crack + License Key PC/Windows 2022 [New]**

The first release of AutoCAD Crack Free Download was the 1983 AutoCAD Model II, followed by AutoCAD Model III in 1984. Both were shipped with microcomputers and could be expanded with additional hardware. The Model III product shipped with an internal graphics board that ran a graphics emulator. The user interface remained the same until AutoCAD 2000. In 1985, Autodesk purchased the original Macromedia division, including the Flash technology for multimedia, and rebranded it as Macromedia AutoCAD. In 1998, Autodesk acquired the remaining Macromedia stock, including Flash. The following year, Autodesk introduced AutoCAD 2001. After more than 30 years of development, AutoCAD was first offered as a web-based application in March 2015. The web app followed two key technology developments, the increased functionality of browser-based JavaScript, and the increasing prevalence of mobile computing, including tablets and smartphones. Web-based

applications are easier to use and have lower hardware requirements than traditional desktop-based applications. Autodesk has shipped versions of AutoCAD that support many file formats, including DWG, DXF, and PLT. AutoCAD supports standard 2D layers and 3D objects. It also supports the following drawing standards: Bridgeport CAD, a cut-and-paste CAD standard developed by the American National Standards Institute (ANSI) and the Bridgeport-Arcata Community Council (BCC). DWG, a standard format developed by Autodesk. DXF, a standard format developed by Autodesk. CAD-Grids, a standard format developed by ANSI and BCC for bridgeport CAD. PLT, a format that supports exports of engineering drawings. CISPR-4, a CAD standard developed by the American Institute of Manufacturing Engineers (AIME). CISPR-5, a CAD standard developed by ANSI. ESRI, a CAD standard developed by the American Association of State Highway and Transportation Officials (AASHTO). As of the end of 2018, Autodesk reported that it shipped approximately two million units of AutoCAD annually. In 2018, Autodesk shipped approximately 13.6 million AutoCAD and AutoCAD LT units, a 3% decline from the previous year. AutoCAD 2017 is a desktop and mobile (web and mobile app) application designed for both the professional and
